-----

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

Distributed solar PV capacity growth by country/region, China, North America, Europe, Asia Pacific, Latin America, MENA, Sub-Saharan Africa, Eurasia, 2007-2024, main and accelerated

Policymakers and investors often wonder whether the PV power potential in a specific country or region is good enough to take advantage of and if so, on ...

According to the International Energy Agency Snapshot 2024, China alone accounted for over 60% of new global photovoltaic capacity in 2023, with the top ...

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...

In many countries of the region the main activities of generation, transmission or distribution of electricity are managed by vertically-integrated state-owned companies.

Utility-scale PV led global installations, but distributed PV remained strong in key markets including Germany, Türkiye, and Brazil. Curtailment is increasingly ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

The development of a 20 MW Grid-Connected Solar Photovoltaic Power Plant in Dublar Char signifies a transformative leap towards sustainable ...
