---

Glen Earrach Energy (GEE) has formally applied to develop a 2GW pumped storage hydro facility near Loch Ness, which could become one of the ...

Germany's grid-scale battery buildout is accelerating. Installed capacity hit 2 GW last quarter - and could reach 3 GW before the end of 2025. Growth remains ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

While energy storage is not a generating capacity fuel type, it is a means for capturing and reserving energy for later use and can help address challenges posed by intermittent and distributed energy ...

What is the least-cost portfolio of long-duration and multi-day energy storage for meeting New York's clean energy goals and fulfilling its dispatchable emissions-free resource needs?

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

This partnership aims to accelerate the delivery of 2GW of firm, primary power to data center sites developed by RSDC through the deployment ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...
