---

? High-Capacity Outdoor Energy Storage for Scalable Applications Key Features: 1075kWh battery storage with 500 kW rated AC output, ideal for commercial and industrial loads. Combines LFP ...

The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, ...

It adopts door-mounted embedded integrated air conditioning, which does not occupy cabinet space, improves the available space of outdoor cabinets, has better structural integrity at the ...

Our professional team will collaborate with customers to design and customize Energy Storage Cabinet solutions based on specific application needs and site limitations.

Connect up to 2 FlexiO systems in parallel to scale power from 500 kW to 1 MW with total storage capacity of 3.8 MWh. Perfect for manufacturing plants, EV charging stations, and microgrid ...

The FlexiO series is a highly integrated battery energy storage system (BESS) designed to optimize performance and reduce costs for stationary commercial and industrial energy storage applications.

This open platform, integrated in the C-Cab, provides access to: o transition from on-grid to off-grid mode via the black start function, o multi-source microgrid autonomous management, o compatibility with ...

Each BESS container has either a 300kW or 500kW PCS system offering a complete, install ready energy storage system. All system systems are offered with either 400VAC or 480VAC 3 phase ...

The BESS solution delivers utility-grade energy storage for commercial and industrial applications. The system features modular architecture supporting 250kW to 500kW continuous power output with ...
