Earlier this year, the city-state launched the region's largest battery energy storage system (BESS). Construction of the ...

There is an increasing trend toward localizing battery value chain, reducing the dependency of battery imports driven by subsidies (e.g., US IRA, Indian PLI scheme) and securing privileged access to raw ...

SynVista advocates localized grid-scale battery storage at ASEAN Battery Conference, highlighting Li-ion as the region's anchor technology.

This paper explores the role of BESS in the ASEAN energy landscape, examining current trends, benefits, challenges, and the pathway towards optimising its potential across the region.

Indonesia has ambition to develop an integrated domestic EV supply chain, from mining and processing battery metals to the production of precursor cathode active materials, battery cells, battery packs, ...

This report underscores Malaysia's position as one of the leading countries in ASEAN's energy transition, showing how consumer-based battery ...

Did you know the ASEAN region needs to install 35-40 GW of energy storage capacity by 2030 to support its solar and wind power expansion? That's equivalent to powering 25 million homes ...

Key market insights indicate a growing preference for battery storage systems in ASEAN countries. This shift is largely due to the increasing adoption ...

Understand the vital role of battery energy storage in Southeast Asia's transition to reliable and sustainable energy sources.
