-----

Thorion Energy is Australia's first Vanadium Redox Flow Battery manufacturer, using exclusive chloride-based electrolyte technology.

Perth-based Australian Vanadium Limited (ASX:AVL) is at the forefront of unlocking gigawatt-hour scale VFB deployment for long-duration energy storage in Australia.

China's Enerflow will partner with Australia's JENMI to jointly develop a 350MW/1,200MWh long-duration storage project, marking a major ...

The vanadium redox flow battery (VRFB) was first invented in Australia, at the University of New South Wales (UNSW) in the early 1980s, after ...

Under this non-exclusive agreement, Idemitsu plans to market, sell and deliver vanadium flow batteries to Australian customers using Sumitomo Electric hardware and Vecco's electrolyte made from ...

A type of battery invented by an Australian professor in the 1980s is being touted as the next big technology for grid energy storage. Here's how it ...

Australian Flow Batteries (AFB) delivers safe, efficient, and sustainable Vanadium Redox Flow Battery solutions for businesses. Reduce ...

Australia's first megawatt-scale vanadium flow battery was installed in South Australia in 2023. The project uses grid scale battery storage to store ...

In summary, the rise of vanadium flow batteries in Australia signals a promising shift in the energy storage landscape, offering cost-effective, reliable, ...
