-----

The Betaray is designed to concentrate diffuse light and generate a powerful beam of solar energy. The Betaray can harness solar energy from the sun, the moon, or even the gray sky of a cloudy day, ...

the stand-alone solar energy charger station implements a ball lens and specific geometrical structure to improve efficiency by 35%.

Fundamentally, his Betaray concept isn't a radical departure from other panel technologies out there since it also uses solar cells to collect ...

His company Rawlemon has created a spherical sun power generator prototype called the beta.ray. His technology will combine spherical geometry principles with a dual axis tracking ...

The Beta.ray 1.00 uses a ball lens filled with water to concentrate diffused sunlight. The water amplifies the sun's rays by over 10,000 times, ...

Betaray is a spherical glass solar energy generator developed by German architect Andr#233; Broessel of Rawlemon Studios. Prototype uses a transparent ball lens and dual-axis tracking device ...

A new spherical solar energy generating globe, "Betaray" has been developed by German architect Andre Broessel and solar energy architect colleagues at ...

This enables the Beta.ray to collect solar energy more efficiently than conventional solar panels with a flat surface that can only harvest energy from sunlight at ...
