The US added a record-breaking amount of energy storage in 2025, according to a new solar industry report published Monday. The growth of battery storage across the US is a rare ...

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more than two decades ...

The amount of solar energy in the U.S. is growing and surpassed the 100-gigawatt mark this year. Another way that the addition of these batteries is helpful to the ...

New storage technologies are driving down costs and are powering a resilient, decentralized grid for a Solarpunk world. Big batteries capable of storing ...

From Texas-sized utility projects to skyrocketing residential battery attach rates, 2026 marks the year solar and storage transition from the electric grid's fastest-growing additions to its ...

Now, as cheap, plentiful solar power floods the grid in the middle of the day, hundreds of battery installations bank the energy and discharge it in the evening when people return home...

Google is building a bevy of renewable energy in Minnesota--including the world's largest battery system providing power for a whopping 100 hours

BigBattery provides lithium-ion battery packs that are perfect for powering any off-grid solar application. Browse our products today to find what you need.

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...
