Software & Services and support experience. ChargePoint also offers various support plans such as ChargePoint Assure. Learn more at

ChargePoint has launched its new Express Plus Power Link 2000 DC fast-charging platform, capable of delivering charging speeds of up to 500 ...

Exposing the ChargePoint charging components to over 406 mm (16 in) of standing water could create an electrocution, shock, or fire hazard. Cut power to the ...

When it comes to technical specifications, the ChargePoint Flex can charge up to 42 miles per hour (tested on the Tesla Model Y ...

Input to output voltage step down factor will be relatively small to allow for lower input impedance, for example, 600V AC to 480V AC, 480V AC to 400V AC etc but not from medium voltages to 3-phase ...

Express Max output power 62.5 kW Max output current 156 A Output voltage, charging 200V - 1000V

All 2026 Toyota and Lexus EVs include a standard dual-voltage 120V/240V home charger with 7.7 kW maximum output. A hardwired ChargePoint Home Flex option can reduce charging time ...

Power Select allows stations to be installed and configured for current lower than the maximum 80A. Power Select current options include 16A, 24A, 32A, 40A, 48A, 50A, 56A, 64A, and 72A.

What is Chargepoint Level 3? Level 3 (also known as DC fast charging) delivers high-voltage power directly to the battery, skipping the car's ...
