Jointly developed by China National Offshore Oil Corporation (CNOOC) and China Southern Power Grid (CSG), it is expected to be the largest parking shed distribution solar power ...

POWERCHINA signed an EPC contract with Baowu Clean Energy Co to build the Zabuye integrated energy supply project which will involve a power supply, grid, load, and energy storage in Southwest ...

Carbon Brief explores how China has been driving the energy storage sector forwards and how it fits into the nation's wider energy transition.

China Huadian and PowerChina have completed the world's highest solar plant in Tibet, capable of generating 247 million kWh of electricity annually.

To meet China's goal of carbon neutrality by 2060, substantial investment in upgrading power systems needs to be made to optimize the deployment of new photovoltaic and wind power ...

In a significant technological advancement, the country's largest "coal-to-power plus molten salt" storage project, located in Suzhou, east China's ...

China is currently planning to build a gigantic solar power station ...

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to ...

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite ...
