The present document specifies the Radio Frequency (RF) test methods and conformance requirements for NR and NB-IoT operation in NR in-band Base Station (BS) Type 1-C and Type 1-H.

Thanks to the much faster, more reliable, and near-instant connections that come with the 5G, we now see a variety of innovative and comprehensive mobile wireless communication applications every ...

Learn about the different classes of 5G NR base stations (BS), including Type 1-C, Type 1-H, Type 1-O, and Type 2-O, and their specifications.

Release 15 specifies 5G phase 1, which introduces a new radio transmission technique and other key concepts such as an industry-grade ...

DSS (Dynamic Spectrum Sharing) functionality can be added to for a certified Base Station operating with LTE B5 and the 5G NR n5 bands. DSS addition does not require operational changes in such as ...

The ADRV9040 RF transceiver provides a streamlined framework for designing, implementing, and testing the RF signal chain lineup of a 5G communication system with ease.

Aether is a Kubernetes-based edge cloud, augmented with a 5G-based connectivity service. Aether is targeted at enterprises that want to take advantage of 5G ...

Explore the principles and best practices for the optical transport of traffic from current and future (5G) cellular networks, from the base stations to the mobile ...

The Fifth Generation (5G) systems are being used across the world to provide better connectivity and data rates. These systems are complex and involve several i.
