Conversion, Storage, and Control Systems of power between the data center infrastructure and the IT gear. Shelves, supports, sub-chassis, and adapters ...

Swedish-Swiss multinational industrial outfit ABB has announced a partnership with Nvidia that will see it support Nvidia's rollout of 800 VDC power architecture for 1 megawatt server ...

A number of vendors have announced new reference designs for 800VDC architecture that will allow operators to prepare for 1MW racks in the ...

Two weeks ago we kicked off one of the most ambitious projects: the development and demonstration of a 1MW high-density rack PoC in Luleå, in the north of Sweden.

Cordovil said single-phase direct-to-chip systems - which are currently the most popular and the variant that LiquidStack's new CDU supports ...

At the 2025 OCP EMEA Summit today, we discussed the power delivery transformation from 48 volts direct current (VDC) to the new +/-400 ...

In April, Google introduced 400 VDC (Volts Direct Current), a voltage that can theoretically support 1 MW per rack. The advantage of 400 VDC is that ...

Featuring more advanced technology with higher power density and large capacity, achieving up to 1 MW per rack; compatible with future GPU requirements, ...

With contributions from Google, Meta, and Microsoft, the specification aims to provide IT racks the ability to support up to 1 megawatt (MW) of load per rack via a disaggregated power architecture.
