The Kosova e Re was a project of the Government of Kosovo to build a new 2,000-MW coal-fired power plant near Pristina, to rehabilitate the existing Kosovo B power plant and completely shut down the Kosovo A power plant which is considered the largest source of pollution in Kosovo. It also included the development of a new lignite mine in order to meet the needs of the Kosovo B and the newly constructed power plant. It was originally estimated to cost US\$2 billion.

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, ...

Kosova E Re Power Plant DetailsCoal SupplyPower TransmissionFinancingContractors InvolvedKosova E Re Project BackgroundThe Kosova e Re power plant will be built on a site located adjacent to the existing Kosovo B TPP at Obiliq, Prishtina district. The site is accessible by road via the Durrë-Kukës highway, which runs 264km from Durrë to Pristina. Infrastructure facilities for the project include a thermal power plant housing a supercritical boiler and a steam tur...See more on [energybusiness](#).
