-----

The Ministry of Industry and Trade (MOIT)'s Electricity and Renewable Energy Authority (EREA) along with Global Energy Alliance for People and Planet ...

Specifically suited to battery energy storage system (BESS) solutions, this paper presents a new resilience-driven framework for hardening power distribution systems against ...

Through this partnership, Hoenergy will further strengthen its regional footprint and contribute to Vietnam's renewable-energy objectives with high ...

Vietnam is accelerating efforts to develop a large-scale battery storage market, aiming to strengthen its renewable energy transition. On ...

In this process, energy storage systems are not only a technological solution but also an essential component to ensure power system stability, optimize renewable energy sources, and ...

This initiative combines solar power with hydrogen technology to create a 50MW hybrid energy system, positioning Hanoi as Southeast Asia's first major city adopting grid-scale hydrogen storage solutions.

Some measures to ensure flexible operation of the power system include upgrading the transmission grid, investing in energy storage systems, and flexible operation of coal-fired power plants.

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power system, ...

This monumental increase, from just 300MW to at least 10GW, is the first time Vietnam has set a serious, actionable goal for energy storage. It's a ...
