The U.S. energy storage industry installed 57.6 GWh of new capacity in 2025, the largest single year of new battery capacity additions on record. Energy storage installations grew 30% from ...

Also, standalone storage made up nearly 30 GWh of new capacity added in 2025, while storage paired with solar accounted for 20 GWh. In addition, the residential energy storage sector ...

The U.S. energy storage industry installed a record 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record.

Two-thirds of all utility scale energy storage capacity installed in 2025 was built in states won by President Donald Trump, including 9 of the top 15 states for new installations. Texas is set to ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Globally, annual energy storage deployment (excluding pumped hydropower plants) is set to hit another all-time high at 92 gigawatts (247 gigawatt-hours) in 2025 - 23% higher than in 2024. ...

Comprehensive guide to renewable energy storage technologies, costs, benefits, and applications. Compare battery, mechanical, and thermal storage systems for 2025.

According to the Q4 2025 US Energy Storage Monitor from Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP), 2025 energy storage installations ...

In 2025, US energy storage sector experienced a turbulent ride as the Trump administration took significant action to roll back and eliminate key ...
