Recent updates to US trade regulations are reshaping the battery energy storage sector, accelerating adoption of diverse chemistries beyond lithium-ion.

Although lower-priced batteries may benefit battery consumers (e.g., EV manufacturers) in the short term, reliance on imports for these critical components may present supply chain diversification risks ...

Explore how Foreign-Trade Zones (FTZs) can strategically benefit battery and energy storage operations by mitigating duty exposure, enhancing cash flow, and providing a competitive edge in the ...

The global energy transition towards renewable resources requires the mass deployment of battery storage technologies. Lithium-ion (Li-ion) batteries are expected to play ...

In this article, we consider trade of three key minerals needed for batteries--graphite, lithium, and cobalt--among China and key global regions.

This article explores market dynamics, logistics best practices, and emerging opportunities in international battery trade - essential reading for importers, exporters, and renewable energy project ...

Taking advantage of lucrative tax credits offered by the 2022 Inflation Reduction Act (IRA), battery makers from China, South Korea and Japan are investing billions into US factories, ...

Under the Department of Energy Office of Manufacturing and Energy Supply Chains (MESC) Battery Materials Processing and Manufacturing Grants Program, DOE has committed approximately \$5 ...

This snapshot explores top foreign markets of parent companies operating in the advanced battery industry to help economic developers gain a better understanding of the global landscape.
