In the third quarter, the volume of electricity from solar panels fed into the network totaled 261 GWh, subsidies for which amounted to EUR10.1 million. Thanks to the addition of new ...

The company's main activity is creating and managing the infrastructure required for solar energy production and selling the ...

Solarvance provides custom-designed, cold-climate ready solar systems suited to Estonia's unique environment. Whether you're looking for grid ...

"By increasing solar-energy capacity in Estonia and integrating the Baltic states into the continental European grid, we improve energy security and resilience, reduce emissions ...

Discover the strategic case for manufacturing solar modules in Estonia. Learn how specialized panels engineered for snow and low ...

Renewable energy consumption in Estonia is steadily increasing, surpassing the EU average. By 2023, 41% of energy production came from renewable sources. Estonia's ...

The decline in biofuels in 2025 is concerning, but the uplift in wind energy generation that same year, albeit modest, is encouraging. It is crucial for ...

This study focuses on solar irradiance and energy generation potential in different regions of Estonia as a case study. Techno-economic analysis of possible solutions to use ...

In 2022, Estiko Energia will start constructing the largest solar park in the Nordic and Baltic countries. The forthcoming solar park in Raadi, Tartu, ...
