Monasavu-Wailoa is an 80MW hydro power project. It is located on Nanuku river/basin in Fiji.

Data and information about power plants in Fiji plotted on an interactive map.

Monasavu"s opening marked a turning point in Fiji"s energy future. This landmark project signaled a rise in homegrown power and kicked off a broader shift toward renewables, shaping the ...

Kinoya power plant is an operating power station of at least 86-megawatts (MW) in Suva, Fiji.

Find and reach Power stations in Fiji using verified phone numbers, websites, and category filters for smarter, targeted prospecting. Plan new Power stations openings or rollouts using density maps and ...

The Monasavu Dam is a rock-fill embankment dam on the Nanuku River about 60 kilometres (37 mi) northwest of Suva in Naitasiri Province, Fiji. It is located just above the Monasavu Falls and is both the tallest and largest dam, which also withholds the largest reservoir in the country. The primary purpose of the dam is to produce hydroelectric power and it supports an 80 megawatts (110,000 hp) power station. To ...

Many of these projects are already complete, some are in progress, but there is still much to do to reach our goal of sourcing 90% of our electricity from renewable energy by 2035.

The government-owned Fiji Electricity Authority (FEA) is responsible for generating and providing power. The largest power stations in Fiji are hydroelectric dams in Wailoa and Monasavu, and geothermal ...

Wailoa Hydroelectric Power Station is Fiji"s largest power station with four generating units and a total capacity of 78MW.
