This technology strategy assessment on flow batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 ...

Relying on Panzhihua's rich vanadium and titanium resources, the project will invest approximately 1.6 billion yuan to build Sichuan Province's first vanadium liquid flow energy ...

Long-duration energy storage solutions provider Sinergy Flow has closed a late-seed funding round, raising EUR 7 million (USD 8.25m) to expand its team and advance the ...

Vanadium redox flow batteries (VRFBs) can effectively solve the intermittent renewable energy issues and gradually become the most attractive candidate for large-scale stationary energy ...

Flow batteries will play a role in the storage and stabilization of renewable energies, such as wind and photovoltaic energy.

Enter the Dushanbe Energy Storage Power Station - Tajikistan's \$200 million answer to energy insecurity. This lithium-ion behemoth isn't just a battery; it's the Swiss Army ...

Battery Council International (BCI) announced the formation of its Flow Battery Industry Group (FBIG) in 2023 in response to ...

The flow-battery sector has met with a number of false dawns before. This time, developers and producers say, the technology is ready.

Flow batteries are gaining traction in Tajikistan as they offer longer duration storage solutions, making them suitable for the country's mountainous terrain and intermittent power supply.
