-----

NOVEL FLOW BATTERY AQUABATTERY is an acid-base flow battery based on reversible water dissociation, developed in the Netherlands. The battery stores electricity in the form of chemical ...

Long-duration energy storage solutions provider Sinergy Flow has closed a late-seed funding round, raising EUR 7 million (USD 8.25m) to expand its team and advance the development ...

Norwegian renewables company Statkraft and Dutch climate tech start-up Aquabattery partner to develop a promising technology to improve long ...

AQUABATTERY, established in 2014 in the Netherlands, develops advanced saltwater flow batteries for long-duration energy storage. Their scalable, non-toxic technology supports a global shift toward ...

A Dutch company has developed a patented and scalable redox flow battery technology designed to deliver long-duration, grid-scale electricity storage. The system is based on hydrogen ...

Flow Batteries Europe is working to create and reinforce networks between key stakeholders in the flow battery industry. Become a member of Flow Batteries Europe and play an active role shaping a long ...

Learn about the technology of flow batteries, their working mechanism, impact on the energy sector, and various types for large-scale ...

Netherlands-based Elestor has announced it will move from hydrogen-bromine to hydrogen-iron flow batteries because of the worsening geopolitical situation.

To fully evaluate the performance of new redox active materials and membranes, a large focus lies on studying flow battery prototypes in the battery lab at DIFFER.
