Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, curtain walls, ...

Curious about what kind of glass is used in solar panels? Click here to learn about the different types, the properties of each and why the glass type matters.

Photovoltaic (PV) glass is revolutionizing the solar panel industry by offering multifunctional properties that surpass conventional glass. This innovative material not only generates power but ...

Discover the critical role of specialized glass in solar panel efficiency and durability. This guide breaks down the types of glass used in photovoltaic systems, industry trends, and how choosing the right ...

The glass used on solar panels is designed to be super clear, with low iron content to reduce any greenish tint or foginess. This means more sunlight gets through to the PV cells, ...

Cover glass for solar panels is a crucial component that serves as a protective barrier for the photovoltaic cells, which convert sunlight into electricity. It is typically made of tempered glass, ...

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.

Where photovoltaics meet limitless design, where color meets clarity. You're choosing a future where sustainability is clear as day.

The NSG Group offers a range of specialised glass and coated glass products used in all of the leading solar energy technologies, including thin film photovoltaics, crystalline silicon photovoltaics, ...
