-----

DER means small scale electric generation units located within the electric distribution system at or near the end-users. It is usually considered to be constructed aiming at utilising local ...

The project will deploy 20 sets of Jinko ESS G2 5MWh liquid-cooled energy storage systems (configured for four-hour long-duration storage), distributed across 20 distinct project sites ...

Nikos Mantzaris placed special emphasis on self-production -- small-scale RES systems designed to meet the needs of energy communities, ...

As Managing Partner of Wattcrop, I had the pleasure of participating in a panel of experts from organizations representing the Greek energy market. The discussion focused on key issues ...

MORE completes three large-scale energy storage systems in Greece, totaling 72 MW and 144 MWh, boosting renewable energy use, lowering electricity costs, and strengthening grid ...

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority ...

Greece continues its trajectory towards decarbonisation, with renewables leading the way. As of early 2025, more than 10.2 GW of RES ...

The Scheme targets standalone energy storage technologies with a minimum injection capacity of 1MW connected to Greece's high-voltage transmission system managed by the ...

As Greece accelerates its renewable energy ambitions, grid-scale battery energy storage systems (BESS) will be vital for balancing solar and wind ...
