At New Energy Argentina, collaboration drives our success. Working with world-class partners, we combine international expertise with local knowledge to accelerate Argentina's clean energy ...

Several companies are investing in renewable energy projects; some of the major players in the renewable energy market include YPF, Genneia, Pampa Energia, Enel Green Power, and 360 Energy.

However, the energy transition in Argentina faces some important challenges. One of the most important is the need to modernize and expand ...

OverviewHistory of the electricity sectorElectricity supply and demandTransmission and distributionAccess to electricityService qualityResponsibilities in the Electricity SectorRenewable energy resourcesPrior to 1991, the electricity sector in Argentina was vertically integrated. The sector experienced a serious crisis in the summers of 1988/1989, primarily due to the lack of maintenance of the country's thermal power plants (50% were unavailable). Shortly after the crisis, the government of Carlos Menem introduced a new legal framework for the electricity sector through Law 24,065, which included the following elements: vertical and horizontal unbundling of generation, transmission and distribution; openi...

Argentina is aiming to generate 57% of its energy from renewable sources by the end of the decade, according to an official energy transition plan ...

Argentina's electricity mix includes 49% Gas, 24% Hydropower and 12% Wind. Low-carbon generation peaked in 2024.
