As Guyana positions itself as a Caribbean energy leader, this EPC project demonstrates how electrochemical storage can transform national grids while supporting sustainable ...

The project is a central component of Guyana's push to lower energy costs and emissions by replacing heavy fuel oil (HFO) with natural gas for electricity generation.

As a key component of Guyana's landmark Gas-to-Energy (GtE) initiative, the BESS will enhance the project's efficiency and ...

The project in the Volyn region involves the construction of an energy storage system (ESS) with a capacity of 8.4 MW and a storage capacity of 10 MWh, utilizing the Huawei Smart String ...

Guyana has unveiled a new 0.65 MW grid-forming solar project, paired with a 1,500 kWh battery energy storage system (BESS) ...

After a period of dedicated efforts, on January 27, 2025, the Wakenaam Diesel and BESS Storage Project was officially completed.

Guyana's project isn't just about storing energy--it's about harnessing chaos. With 87% forest cover and rivers that behave like moody teenagers (unpredictable and full of ...

Designed to respond instantaneously, BESS provides "critical" backup power to protect the integrity of the electrical grid and maintain operational stability in the event of ...

Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John ...
