This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

This guide compares leading solar panel manufacturers worldwide, examines the resurgence of US manufacturing, and shows how businesses can source panels wholesale.

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than ...

For 2025, the top HJT solar panel manufacturers in China are JinkoSolar 1, Risen Energy 2, Tongwei 3, Aiko Solar 4, and our own ...

The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data. Data collected on both the ...

3.2 million US homes have solar panels installed. 3,975,096 people are employed in the solar industry worldwide, and 263,883 of these are in the ...

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

With over 600 operational data centers, many corporations mitigate the impact on the grid through solar and storage. Nevada generates nearly one-third of its electricity from solar, benefiting from abundant ...
