You can choose to either go with parallel or in series, it doesn't really matter all that much in the grand picture, both scenarios will boost volume enough to work for E85.

Unless they've been updated, Walbro 255's are not E85 compatible. The pumps will prematurely die. While they do live, I would be surprised if they supported beyond maybe 750whp. I ...

E85 is a cheaper / more readily available fuel type but it isn't magic. It will only add more power if your previous fuel was causing a bottleneck in ignition advancement IE detonation.

Your tuner may have been conservative on the ethanol tune. The guys picking up huge gains from gas to E85 may have conservative setups on the gas tune, too. There are a lot of ...

We have found that even in these situations you can still expect to see an additional 5% more power, making the switch to E85 a worthwhile consideration. The only downside is that you will be burning ...

Learning how to calculate inverter size for your needs can be a tricky task, especially if you're unfamiliar with how an inverter works or how much power ...

I know it'll never be as powerful as the 370Z, but didn't know what to expect when looking at what I can do to lessen the acceleration gap a little bit since I haven't owned / modded one before.

To calculate the maximum size of an inverter that your car can handle, you need to determine the maximum amperage that ...

Thinking i may just add another 044. Depends on how much a single A1000 will do on E85.
