COMPONENTS Create your own 3d Component and insert directly in 3D model or customize the existent database of solar panels.

Design solar thermal or solar photovoltaic installations starting from a 3d model. Design residential installations or ground mount power plants in a ...

In this video i have explained about how to built a RCC Roof and to place solar Modules in roof without affecting the shadow and to count the number of solar modules placed.

Learn How to Design Solar Projects in 3D Using SketchUp! This step-by-step tutorial covers solar panel 3D layout and shadow analysis using SketchUp - ideal fo...

Install, uninstall, and update free and pro Skelion plugin in SketchUP. Insert solar panels on planar faces, using Skelion and SketchUP. Organize your own solar panels database and ...

How to calculate the number of specific faces according to their size or area in a complex model?

A photovoltaic (PV) system is a system capable of converting solar energy into electrical energy, explaining it in a very basic way. Our aim here is to use this type of system for our model.

Learn how to seamlessly design your solar energy projects by importing any Solar PV Module into SketchUp using its datasheet! ? Whether you're an engineer, architect, or solar enthusiast,...

My concern is that I cannot count the number of modules in a particular section of the roof. The entity info shows me the number of ...
