BC 2 300X/500 Battery Conditioning (pgs. 35-36) in ZincFive's BC 2 Series UPS Battery Cabinet Service Manual for the recommended UPS LVCO and expected power levels in the customer application.

Power wiring is installed externally between each battery cabinet and the UPS or battery disconnect using conduit. Battery cabinets may be installed adjacent to the UPS or in a separate location.

The option provides functional access to the equipment circuit breaker via a handle located on the exterior of a cabinet door that is physically connected to the circuit breaker in the cabinet's interior.

This video walks through the correct power-on procedure for JNTech energy storage battery cabinets.

Connect the DC+ and DC- cables to the DC+ and DC- terminals. Connect the power cables in the UPS. If more battery cabinets are part of the solution, connect all battery cabinets to the UPS according to ...

If the battery cabinet includes an integrated battery charger ("C" models only), examine the wires at the DC output terminal closely. If any of the leads are bent ...

Draw a wiring schematic representing the cables connected between the battery cabinet's output terminal blocks and any external disconnect device, junction box and/or load/rectifier.

Set first battery in cabinet and attach the long lead (fast-on connector side marked positive) from the cabinet to the fast-on terminal on the positive terminal of the battery.

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.
