This is a question I get regularly from readers, so let's examine the pros and cons of including a domestic storage battery in a prospective solar ...

As grid volatility and electricity costs rise, Freen's latest 10kWh LiFePO₄ battery offers Irish homes a high-performance, low-maintenance storage solution built for endurance.

EnergyPro are passionate about supporting the transition to a carbon-free economy. We do this by effectively managing and expertly analysing our ...

A new generation of long-duration storage technologies is emerging. Iron-air batteries, like those planned in Donegal, work on an elegant principle: ...

Battery energy storage systems, or BESS for short, are a relatively new development in Ireland and, if built on your farm, it could be one of the most ...

The consultation stems from the Government's Electricity Storage Policy Framework of 2024 which, following a Call for Evidence on long duration ...

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery ...

Emerging technologies like sodium-ion batteries and enhanced thermal storage solutions are specifically designed to perform optimally in Ireland's climate, offering reliable power even during ...

Battery storage systems store electricity generated from renewable sources such as wind and solar. Surplus energy from these sources can be retained and ...
