OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies withi...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

What are the best solar generators available? Based on watts (W) and watt-hours (Wh), we've compiled a ...

Even if you don't have solar yet, you can start with a Base battery now and easily add solar later. Read on to learn how Base helps you get the most from your solar energy system. Base ...

More than half of the new utility-scale solar capacity is planned for three states: Texas (35%), California (10%), and Florida (6%). ...

China is using the high-altitude expanse for immense solar panel farms and wind turbines and has begun work on the world's largest ...
