The presented paper describes an energy-economic assessment of an island system with a photovoltaic field, small wind turbine, wood chip gasifier, ...

Ingenium contributed to the construction of energy islands in collaboration with Solarzondergrens, a Bruges-based firm active in development projects in Togo. These projects were carried out in ...

"The island of Tobago is poised for productive growth, and to fuel that growth it made sense to tender for an additional generator. Our GE Vernova LM2500 ...

By addressing these critical gaps, our research significantly advances the resilience and economic viability of island microgrids, ensuring secure energy management in dynamic environments.

A new hybrid minigrad that will provide clean, reliable and efficient energy supply to residents of Tonga was recently commissioned for the Polynesian island nation.

Hydrogen-based microgrids are receiving attention as critical pathways are being charted for the decarbonization of our thermal, transport, and power grids.

After driving consensus with the client, HRE delivered an engineering design and RFP package to support the client's efforts to go to market. Based on HRE's recommendations, the client won ...

Globally, over 10,000 islands rely on expensive, polluting diesel generators. Hybrid microgrids now deliver 90% diesel displacement, 24/7 ...

Islands and remote regions face unique energy challenges due to their isolation from mainland power grids. Hybrid renewable microgrids offer a promising solution, combining multiple clean energy ...
