In partnership with the company Energy Vault, SOM is designing and engineering the next generation of gravity-based energy storage ...

These projects include a 115MW utility-scale solar plant, 172MW of battery storage across multiple sites, and a 12MW onshore wind farm. JPS aims for these projects to ...

Investigative work will start in May and, if successful, Gravitricity will deliver a concept design and project development plan to ...

Finding green energy when the winds are calm and the skies are cloudy has been a challenge. Storing it in giant ...

With a combined solar generation capacity of 540MW, and 225MW/1,140MWh of battery energy storage system (BESS) technology, the project is providing electricity to state utility and grid ...

Power utility Jamaica Public Service Company, JPS, is investing US\$300 million to construct Jamaica's largest solar power plant and a battery storage facility, starting this month.

Explore how battery energy storage systems are transforming Jamaica's power sector--cutting energy costs, reducing outages, and enabling renewable energy growth.

This paper presents innovative solutions for energy storage based on "buoyancy energy storage" in the deep ocean. The ocean has large depths where potential energy can ...

BMR developed all the required contracts, environmental permits and a financing package from multiple lenders to construct the ...
