Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

In this detailed tour we show you the largest solar projects in the world and the innovative solutions that have emerged to overcome barriers to space, ...

From rooftop installations to large solar farms, solar energy systems are growing rapidly worldwide, revolutionizing the way we produce, distribute, ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

The countries that will be of greatest influence in terms of producing this solar energy by 2025 are as follows. Top 10 largest solar energy producers ...

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

Solar energy capacity has increased by approximately 70% over the last seven years, rising to 773 GW in 2020. But where are the largest solar power plants? ...

Large solar generator production

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...
