-----

Prices for photovoltaic (PV) panels have jumped 15-20% since January across major markets like Europe and China . But wait, isn't technology supposed to make things cheaper?

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

In the short term, cell prices are expected to remain weak but stable. Future trends will depend on the pace of cell production recovery, silver price ...

Understanding solar panel pricing is critical for distributors, project developers, and commercial buyers. This article breaks down current factory prices, market drivers, and strategies to optimize ...

All solar PV (Photovoltaic) real-time price update, such as Panle/Module, Inverter, Wafer, Cell, and poly / Silicon, and research reports.

You've probably heard solar power is getting cheaper, but did you know Chinese manufacturers dropped panel prices by 42% since 2020? As we approach Q2 2025, China's average solar panel costs stand ...

Solar panel prices in Europe have dropped by 0.01EUR/watt due to weak demand, excess inventory, and manufacturer promotions. While temporary, this decline offers cost-saving ...

Due to limited data availability, we use the Global Price Index series reported by IRENA, based on pvXchange benchmark prices for modules sold in ...
