-----

Between the upending of tax policy, new punitive, anti-solar regulation, and an unabashed pro-fossil fuels agenda, this administration is creating instability that is scaring off ...

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach ...

Local restrictions have been applied to distributed and to utility-scale projects; to wind and to solar; and include ordinances that apply blanket bans or moratoria on project construction. This memo surveys ...

Summary. Solar energy is a rapidly growing market, which should be good news for the environment. Unfortunately there's a catch.

Over just the past few years, more than 100 rural U.S. counties have banned or severely restricted utility-scale solar development, the paper said. ...

Solar accounted for 93% of all the energy curtailed in CAISO in 2024. CAISO curtailed the most solar in the spring, when solar output was relatively high and electricity demand was ...

For each state, we created an overview of current and past state law on the placement and regulation of wind and solar power, and a list of counties that currently have blocks.

From solar farms sprawling across acres of land to hydropower dams affecting fish migrations, the global shift to ...
