Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg, Switzerland, in what could become one of ...

The world's largest battery storage facility is to be built in a new technology center in Laufenburg (TZL) in the Swiss canton of Aargau - directly on the German border.

Municipal utility Thurplus has commissioned a 3MW/3MWh battery energy storage system (BESS) in its Canton of Thurgau, Switzerland. Thurplus ...

The Limmern pumped storage plant works as a large battery. It can be used for turbines and pumps and contributes to security of supply in Switzerland.

At that point, the facility is expected to become not only the world's largest redox flow battery but also one of Europe's most important energy and ...

Flexbase Group has begun construction on what could become one of Europe's largest flow battery storage installations, breaking ground on an 800 ...

We have the only exclusive license to date for mass production of these solid-state batteries and an additional license to market industrial storage systems in ...

By reducing reliance on conventional lithium-ion storage and fossil-fuel-based power stabilization methods, Switzerland is setting an example for sustainable energy management.

The following page lists power stations in Switzerland. For traction current see List of installations for 15 kV AC railway electrification in Germany, Austria and Switzerland.

Lithium battery power station in Switzerland
