The American Solar Energy Industries Association forecasts that another ~1.5 GW of solar PV will be installed in the state over the next four years (2018-2021).

Continued growth in solar and storage deployment in Massachusetts can save ratepayers \$313 million per year through 2030, found a study by Synapse Energy Economics and the ...

Answers to your questions about solar power and your home, considerations before installing solar, and National Grid's involvement with solar.

Massachusetts homeowners pay an average of \$0.29/kWh for electricity -- well above the national average of \$0.16/kWh. With 3.8 peak sun hours per day and multiple state incentives, an 8 ...

With a solicitation process facilitated by MassCEC, each participating community competitively selected a preferred solar photovoltaic ("PV") installation company to be a partner in the campaign.

Solar power in Massachusetts has been increasing rapidly, due to Section 1603 grants for installations that began before December 31, 2011, and the sale of SRECs for \$0.30/kWh, which allows payback for the system within 5 or 6 years, and generates income for the life of the system. For systems installed after December 31, 2011, and before December 31, 2016, the 30% tax grant becomes a 30% tax credit. There has ...

This section describes the different types of solar energy and how they are used in Massachusetts. In addition, find out what solar programs and incentives are currently available for your home, business, ...

Solar panels might seem expensive, but if you live in Massachusetts, you're in luck. Your state offers some of the most generous solar incentives in the country, helping thousands of ...

Learn all you should know about Massachusetts solar laws, including federal and state policies, regulations, and incentives, before installing photovoltaics in Massachusetts
