-----

The project, announced in late 2025, will see old batteries removed from Irizar electric buses redeployed for stationary energy storage applications. The agreement covers traction batteries ...

The Spanish energy agency has proposed funding for 144 energy storage sites totaling 2.61 GW and 11.14 GWh under a European Regional ...

FRV is developing over 1.2 GW of battery storage across Spain, with hybrid and stand-alone BESS projects expected to reach Ready-to-Build status between 2026 and 2027.

The selected projects range from large-scale battery systems to industrial thermal storage and new pumped-hydro plants, reflecting both the technological maturity of the sector and ...

FRV, a leading developer of sustainable energy solutions, and part of Jameel Energy, continues to strengthen its portfolio in Spain with the development of more than 1,200 megawatts ...

Spanish company FRV aims to hybridize its Spain-based solar portfolio and increase its battery energy storage (BESS) capacity in the country. The developer says its projects are in an ...

Madrid-headquartered independent power producer (IPP) Grenergy has reached financial close on the first two phases of its Oasis de Atacama solar and battery energy storage hybrid project in Chile.

It will be part-financed by the European Regional Development Fund (ERDF). It will take the form of direct grants covering no more than 85% of a ...

Spain's battery storage program expanded to EUR840M, funding 143 projects totaling 8.9GWh. Learn how this initiative creates opportunities for solar-storage hybrids and boosts grid ...
