When the solar project was first proposed in February 2020, the company said it would provide 150 megawatts of power and cover about 1,200 acres in Portage and Summerhill townships.

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across ...

After bringing on 6.8 GW of natural gas, wind, and solar generation since 2010 and with a current pipeline of over 10 GW of renewable and dispatchable generation projects, including utility-scale ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the ...

Generating approximately 185,000 MWh annually, the facility will help avoid nearly 100,000 tons of carbon dioxide emissions annual by displacing generation from ...

A former coal mine in western Maryland is now generating solar power - and it's the largest solar farm in the state.

CPV Maple Hill Solar is an operating solar photovoltaic (PV) farm in Portage, Cambria County, Pennsylvania, United States.

To be built on former Vindex/Arch Coal mining sites just north of Kitzmiller, the solar project will support Maryland to achieve its clean energy targets of 14.5% solar energy by 2028 and 50% renewable ...

Aspen Power is a distributed energy generation platform with the dual mission of accelerating and democratizing decarbonization. We partner with ...
