Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize ...

A new analysis by DNV finds that the Middle East is entering a period of rapid renewable power growth, led by very large solar projects and the increasing use of energy ...

A comprehensive technical and financial analysis comparing Solar PV and Onshore Wind in the MENA region. Deep dive into LCOE, Capacity Factors, Hybrid Systems, and the 2025 ...

Looking at historical data, project pipelines and numerous (often highly optimistic) announcements of future plans and targets, large differences among countries are observed, indicating that the ...

According to a new report from DNV, MENA is about to enter a period of rapid growth when it comes to renewable energy, with the ...

In 2025, the region is scaling up large-scale solar and wind capacity while positioning itself as a global clean energy hub. For investors, these developments offer high ...

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. Read more here.

In a region of the world renowned for its vast and substantial oil and gas reserves, several nations in the Middle East are shifting their energy sectors towards hybrid wind-solar ...

The region's most significant wind power projects - those recently constructed, newly underway, and in the pipeline - show how it is reshaping its broader energy mix.
