Leonardo DRS has taken this proven liquid immersion cooling technology and ruggedized it for use in harsh environments and mobile applications, bringing ...

Data center operators aiming for an oil and natural gas-free immersion cooling liquid can use bio-based dielectric liquids as an alternative. These liquids, ...

From the desert to the tundra, this immersion-cooled data center is ready to go.

Procured through a global defense prime contractor, the win represents the first liquid immersion-cooled high-performance compute solution for a U.S. ...

Immersion-cooled mobile data centers offer a revolutionary solution for data management by combining the requirements of portability and efficient cooling. ...

In 2026, liquid cooling is mandatory for 100kW AI data centers. Learn how key partnerships are solving the power crisis and shaping the future of cooling. Discover more.

Meet soaring compute demands efficiently with LiquidCool Solutions" versatile, immersion cooling for high-performance GPU dense servers. Perfect for data centers, AI, edge computing, and tough ...

The current work systematically reviews the research progress on immersion cooling technology in electronic device thermal management, including the properties of immersion coolants, ...

Immersion-Ready High-Performance Servers: Integrate seamlessly with our immersion cooling technology for optimal performance. Custom Critical Infrastructure Modules: House your immersion ...
