The SL9682 kit system incorporates a customised solution for projects and new installation requiring a full fibre optic lighting solution including fibre optic cable, fibre optic end fittings and LED light engines.

The Parans solar lighting system delivers zero-carbon natural sunlight for indoor environments and constructions. It uses innovative fiber optic lighting technology and design.

Solar fiber optic lighting is a fascinating technology that relies on three key components to function: the solar collector, fiber optic cables, and lighting fixtures.

Where Can Fibre Optics Be Used ?Use Your Imagination with Light & ColourThe Benefits of Fibre Optic LightingAs a lighting medium, fibre optic lighting is free from a lot of the constraints of traditional lighting forms. The flexible optical cable carries light from a remote light source to where it is needed. Fibre optic light sources or illuminators are available with both metal halide lamps or LEDs. Traditionally glass colour wheels have been positione...See more on specializedlightingconcepts .nzsled .nzSpecialised LED Products | Our ProductsSee MoreEach panel has up to 116 fibre optic cables that are drilled and glued into place using a special 3M low melt adhesive so it does not damage the fibre, and loomed to run back to where the light engines are ...

Superlight offers professional fiber-optic lighting systems suitable for commercial and residential lighting projects of all sizes.

Fiber optic cables bring natural daylight all the way into windowless spaces without skylights and other openings, using solar collectors.
