Discover the secrets to long-lasting solar panel performance with our guide on choosing the right materials and mounting structures. Learn how each ...

Origami Solar is the developer of a patent-pending steel solar panel frame that is transforming the solar industry through high-speed domestic production, reduced material and manufacturing cost, and ...

Manufactured in our state-of-the-art facility in Marshall, Michigan, we operate with 8 advanced welding stations, an I-Beam production line, and precision laser cutters, delivering fast lead times and ...

The size or dimensions of the solar panels, measured in height by width, will determine the number of solar panels that will fit on your roof and the wattage of solar panels ...

Our steel frame is made by cold formed light gauge steel construction profiles. Furthermore we can manufacture according to customer wishes. If you ...

Learn more about the types of structural beams that are used for ...

We're producing the steel structures designed to support solar panels used in all types of applications. These solar support structures are an optimal solution for ...

The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured ...

The back of the rails that the PV panels are bolted to are supported by vertical aluminum legs, which are in turn supported by ...
