-----

The roadmap was compiled using inputs from a wide range of stakeholders from the PV industry, power sector, research and development (R& D) institutions, finance, and governments.

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Department of Energy

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

As part of the REPowerEU plan, in May 2022 the Commission adopted an EU solar energy strategy, which identifies remaining barriers and ...

As a result, solar is increasingly outperforming other power generation technologies across the board. There is no doubt that solar power has become the driving force of the global ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...

Policy hotspots included PV products, PV generation systems, PV modules, product quality, and technological innovation, reflecting the requirements for high-quality development in the ...
