The PHC (pre-stressed high-strength concrete) pile foundation, serving as an innovative supporting structure for solar power stations, is subjected to complex loading ...

Knowing the site's geological characteristics allows engineers to choose the most suitable pile type and driving method, ensuring a stable ...

To study the frost jacking performance of photovoltaic support steel pipe screw pile foundations in seasonally frozen soil areas at high latitudes and low altitudes and prevent ...

This study has comprehensively investigated the bearing characteristics of three types of photovoltaic support piles, serpentine piles, ...

Pile foundations are still the preferred foundation system for high-rise structures in earthquake-prone regions. Pile foundations have experienced failures in past earthquakes due to liquefaction. ...

This paper aims to offer innovative ideas and methods to address the challenges of PV bracket pile foundations in desert gravel areas through the design of this new type of PV bracket...

In this study, the frost jacking characteristics of steel pipe screw piles for photovoltaic support foundations in high-latitude and low-altitude regions are studied via in situ tests and ...

Explore the complete guide to ground-mounted solar foundations. Compare driven piles, helical screws, concrete, and ballasted systems to find the best solution for your PV project.

In solar photovoltaic (PV) projects, the selection of pile foundations directly affects the stability, construction efficiency, and overall cost of the PV ...
