Solar panels with sisal fibre sheets exhibit adequate tensile strength and impact resistance and reduce operating temperature by 2-3 °C, ensuring stable operation and minimizing ...

MBI's Polyester Board acoustic panels are 100% polyester made from recycled and virgin fibers. With environmental friendliness in mind, our panels are fire ...

Whether you are insulating walls, floors, or exterior surfaces, foam board helps reduce heat loss and adds lasting protection against moisture and temperature changes.

DUN-SOLAR PPE+ is a multi-layered all-polyester film lamination designed to be used as the backsheet for photovoltaic solar panels. It acts as a durable ...

As core materials, by the lower price, higher physical performance, and easy processing, PET foam is gradually being used to replace traditional sandwich core materials such as Balsa wood, and PVC in ...

Choose from our selection of polyester (PET) foam, including clear moisture-resistant polyester film, moisture-resistant polyester sheets, and more. Same and Next Day Delivery.

Coveme develops and manufactures multilayer and monolayer polymer laminates for the protection of solar panels. These laminates, marketed under the company's dyMat® brand, provide electrical ...

Compatibility with Resins: 2 lb. PIR foam sheets are compatible with various ...

Textilene® offers durable and tough synthetic fabrics made of PVC coated polyester. Designed to reduce heat transfer through windows, this high quality fabric also reduces the glare and harmful UV ...
