By pairing the solar installations with advanced lead battery storage, this project is providing an exciting option for energy-intensive manufacturing facilities to ...

Portugal's electricity network is undergoing a quiet revolution. Investors are shifting from a race to install ever-larger solar fields toward a more ...

Two hybrid projects with more than 630 MWh of battery storage planned in Portugal Lightsource bp is planning an 867 MWp solar and 300 MWh ...

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

The BigBATT project will deploy a large-scale Battery Energy Storage System (BESS) at Carregado, adjacent to the Ribatejo Combined Cycle Gas Turbine (CCGT) in Portugal.

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Hyperion Renewables, a company with nearly two decades of experience in the development, financing, and operation of large-scale renewable projects, has begun construction of ...

Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage ...

Bondalti will have greater flexibility and energy independence with batteries that store renewable electricity produced locally. The storage project is in addition to the solar power stations installed at ...
