SOHAM monster Ian Huntley was given just a five per cent chance of survival after he was battered senseless with a metal pole in a prison workshop. The child killer was in an induced ...

Since the 1950s, NASA has harnessed the energy of the Sun to power spacecraft and drive scientific discovery across our ...

Could the world feasibly switch to all-nuclear power generation? If so, would that be a good counter to global warming? This question was ...

Solar electric systems, which are also called photovoltaic or PV systems, are reliable and pollution-free. They make use of a renewable source of energy--the sun. And PV systems for homes and ...

The ultimate efficiency of a silicon photovoltaic cell in converting sunlight to electrical energy is around 20 per cent, and large areas of solar cells ...

Globally, roughly a third more power is being generated from the sun this spring than last. If this exponential rate of growth can continue, we will soon ...

When the sun is shining, PV systems can generate electricity to directly power devices such as water pumps or supply electric power grids. PV systems can also charge a battery to provide ...

Unlike solar cells in panels, which use sunlight to generate electricity, concentrating solar-thermal power technology uses the sun's heat. Lenses or ...

According to one study, covering just 1.2 per cent of the Sahara with solar panels could generate enough electricity to power the entire world. As ...
