-----

In the final five months of 2024, we expect new U.S. solar electricity generating capacity will make up 63%, or nearly two-thirds, of all new electricity generating capacity to come online in the ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

On Tuesday, the US Energy Information Administration released full-year data on how the country generated electricity in 2025. It's a bit of a good news/bad news situation. The bad news is ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Solar power generation and sensor data for two power plants. This data has been gathered at two solar power plants in India over a 34 day period. It has two pairs ...

The associated Renewables 2025 dataset gives full access to all of the data available in this dashboard for the Renewables 2025 forecast, plus ...

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...
