Romania Electric Vanadium Flow Battery Project

This white paper provides an overview of the state of the global flow battery market, including market trends around deployments, supply chain issues, and partnerships for VRFB stakeholders. It also ...

Cluj-Napoca, Romania"s second-largest city, is experiencing rapid growth in renewable energy adoption. With solar and wind projects expanding across Transylvania, the demand for reliable vanadium ...

Explore how vanadium redox flow batteries (VRFBs) support renewable energy integration with scalable, long-duration energy storage. Learn ...

The most developed flow battery chemistry is the vanadium redox flow battery (VRFB). VRFB has a TRL rating of 9 which means the technology ...

The Vanadium Redox Flow Battery (VRFB) has recently attracted considerable attention as a promising energy storage solution, known for its high efficiency, scalability, and long cycle life.

Discover the Flow Batteries Tour to learn about different flow battery projects being undertaken from Flow Batteries Europe members in Europe and beyond. The ...

The European Commission has approved a EUR103 million (US$125 million) package of direct grants from the government in Romania for battery storage projects.

Explore real-world implementations of our Vanadium Redox Flow Battery systems across different countries and applications. These success stories demonstrate the reliability, performance, and ...

The Fraunhofer Institute for Chemical Technology (ICT) says it has put Europe"s largest vanadium redox flow battery into operation. The battery has a ...
