The wind power project was to be a symbol of Russia's investment in alternative power, and a flagship partnership with a leading western energy ...

Name Area.

Wind power in Russia has a long history of small-scale use, but the country has not yet developed large-scale commercial wind energy production. Most of its current limited wind production is located in agricultural areas with low population densities, where connection to the main energy grid is difficult. By 2018, Russia had a total installed wind capacity of 106 MW, a nearly ten-fold increase over 2016 but still a tiny share o...

Russian metals and energy group En+ is considering building a wind power equipment production site in Russia's Far East with Chinese partners, the region's development agency said on...

Installed capacity is forecast to increase from 2024 to 2035, at which point wind power is expected to account for 3% of total installed generation capacity. Onshore wind power capacity rose ...

The purpose of this study is to identify promising areas for the development of power plants that use wind energy in their work in Russia, as well as specific measures for the development ...

Russian nuclear energy corporation Rosatom has officially launched production of wind turbine blades at its new factory in Ulyanovsk, a site ...

List of wind power plants in Russia from OpenStreetMap

Construction of the wind power plant in Dagestan that will be the largest in Russia is planned to be completed in March 2026, head of Dagestan Sergey Melikov said at the 3rd ...
